

New Podcast: Conversation with Associate Professor Dan Lubman and Professor Iain McGregor - recent research relating to cannabis' effect on the brain.

In the current episode of the University of Melbourne's Up Close series, they discuss scientists' current understanding of the short and long term effects of cannabis on brain structure and function, as well as its impact on adolescent development. The podcast also discusses recent work examining the science of cannabis re-intoxification, as well as recent genetic and brain imaging studies. [Click here to go to Podcast.](#)
